

## WHO IS UKWAZI?

Ukwazi is a Zulu word that means “to know”. This aptly describes the nature of our business: leveraging technical and industry insight and expertise to drive commercial success and sector development.

**We are one of the largest specialist mining service providers in Africa**

### Focused on:

- Bankable feasibility studies
- Independent technical reports
- Engineering & infrastructure design
- Outsourced technical services
- Training and technical skills transfer
- Project and execution contract management
- Build and operate mining infrastructure
- Open pit and dredge mining contracting
- Underground LHOS contracting
- Integration of mining technical systems

We deliver independent advisory, technical systems integration and operational contract mining services, making us your ideal technical and execution partner.

Our technical mining engineering approach, combined with a strong industry experience allows for operational excellence, cost optimisation and continuous improvement.

Our advisory businesses are level 2 BBBEE contributors, committed to transparent and effective transformation within the industry, in partnership with our clients and technical partners.

### Our approach

We are committed to:

- Safety
- Risk mitigation
- Regulatory compliance
- Technical excellence and experience in mining
- Transparent engagement and reporting
- Developing innovative technology and cost-effective engineering solutions
- Enhanced productivity and profitability
- Providing local, on-the-ground sector experts
- Driving skills development and job creation

## OPERATIONAL

## MARKET CONTEXT

We service the industry's demand for outsourced mining contracting solutions that optimise operations, reduce costs, enhance safety and add value.

### What we do

#### Surface Mining Contracting

We provide opencast, open pit and dredge mining contracting services across the African continent, utilising our in-depth industry knowledge and skills, as well as our culture of operational excellence. We focus on supervision, management and control, execution planning and reconciliation for drilling, blasting, loading and materials handling activities based on a single point of contact.

Our successful delivery model yields results based on:

- Our contracting team's strong technical and operational background
- Enhanced health and safety (which is part of our DNA)
- Exceeding production and revenue targets
- Meeting client specifications and quality targets in metals and minerals delivery
- Compliance with technical and regulatory requirements

**SURFACE MINING**

**CONTRACT MANAGEMENT**

**LONG-HOLE OPEN STOPPING**

### We offer:

#### Contract Management

Successful operations are those where the mine owner and the mining contractor's incentives are aligned, and performance is consistently monitored, measured and adjusted to achieve operational objectives. Our team members are experts in mining production, planning, scheduling, survey and reconciliation and are led by professional contract managers.

- Mining works management
- Controls and procedures for health and safety
- Execution and remedial planning
- Survey and performance measurement
- Reconciliation and compliance to plan

#### Long-Hole Open Stopping Contracting

We provide mining specific consultation services, supporting clients at every project milestone - from study phase through to execution, operational readiness, staffing, training, planning and implementation.

- "Supercrews" - highly skilled teams who are able to exceed international benchmarks
- Fully mechanised development, support, long-hole drilling and charging, loading and equipment maintenance
