

Surveyor

We are looking for a talented and experienced surveyor to start on the **1st of October 2021**. The appropriate candidate should have the following competencies and qualifications:

1. Provide quality surveying information and monitoring
 - a. Collect and provide quality surveying information and plans, to enable and monitor the effective extraction of ore (according to mine plans)
 - b. Monitor and report on pit conformance, product movement and stockpile management to ensure the achievement of mine production targets
 - i. Tracking production volumes and reporting on product loss
 - ii. Actively monitoring and reporting on block and pit conformance
 - c. Plan and manage survey and related activities on the mine, ensuring the provision of quality survey information, following company procedures, industry standards and regulatory requirements, including:
 - i. Creating and submitting draft plans
 - ii. Tracking and monitoring product movement
 - iii. Monitoring dumpsites and stockpiles
 - iv. Updating infrastructure plans
 - d. Provide technical consulting services to the operation by sharing in-depth knowledge within the discipline, providing relevant information and reports on pit conformance, and helping identify and solve mining problems
 - e. Apply appropriate best practices and ensure adherence to mining technical and surveying standards
 - f. Manage compliance with relevant mining plans and technical standards, including risk management/governance frameworks
 2. People management and leadership
 - a. Establish a culture of performance, characterised by continuous improvement
 - b. Coach and mentor direct reports
 - c. Establish a healthy and safe work environment for employees
 3. Internal customer relationship management
 - a. Manage customer expectations and requirements to deliver effective surveying services and build key customer relationships
 - b. Enhance customer service levels through delivery excellence
 4. Stakeholder engagement and management
 - a. Work with management and employees to discuss issues, coordinate activities, or resolve problems
- **Qualification**
- Minimum: B. Tech or bachelor's degree in survey from a recognised university
 - National Diploma in Surveying (NQF 6) or Chamber of Mines: Advanced Survey Certification

- **Experience**
 - 10 years' survey experience with a major mining company
 - Experience in coal, base metals, diamond, manganese and iron ore will be an advantage
 - Experience in both open pit and underground mine planning and survey strategies

- **Job description**
 - Full competency in relevant mine planning software
 - Must be able to operate different Survey Theodolites, GPSs and all tools used in the survey department.
 - Experience with I-Site Scanner, I-Site Studio 3D software, Surpac or knowledge of similar 3D software would be an added advantage. Candidate must work from home, travel to the site and/or provide on-site services, which may require relocation
 - Preference will be given to current ex-pat candidates, as these positions are based in Southern Africa.
